

# MetisBaltic

R&D and innovation management

## Company Profile

**Metis Baltic** is a Research and Technological Development (RTD) management company with extensive experience in:

- research project proposal preparation
- consultation regarding access to RTD funding sources
- intellectual property management
- commercialisation of research results

**Metis Baltic** offers a wide spectrum consultations and assistance for researchers from universities, research centres and private organisations in preparation of European Commission's 7<sup>th</sup> Framework Programme – FP7 project proposals, and well as proposals for Cross-Border Collaboration, Competitiveness and Innovation Framework Programme, EUREKA, EUROSTARS, and Structural funds in all research areas.

We provide project management, intellectual property management, commercialisation and dissemination services so that the research community can concentrate entirely on research, development and innovation itself. We also transform RTD results to concrete products and services with a clear commercial exploitation, enabling researchers and scientists to profit from the results of their own work.

**Metis Baltic** is currently participating as a managing partner in two international consortiums:

- CIP – Open Discovery Space: A socially-powered and multilingual open learning infrastructure to boost the adoption of eLearning resources
- FP7-Research for the Benefit of SMEs – SkinDetector: Application of the innovative data fusion based on non-invasive approach for management of diabetes mellitus
