*AbFrontier
AddexBio
BioAtlas
Biomerica
Biosearch
Cell Biolabs
Deliverics
Nanoprobes
ProSpec
ReliaTech*

We are happy to offer products and services of these suppliers to the Nordic countries.

Please read more on the following pages.

www.bio.fi

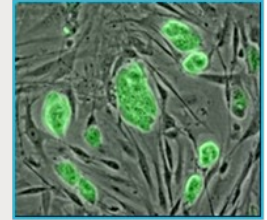

AddexBio is a global provider of quality services and products in preclinical research and development for the academia, pharmaceutical, and biotechnology industries.

A CRO with expertise in medicinal chemistry, ion channel and biology research.

We have a comprehensive cell bank with a variety of cell lines that can be applied to a variety of in vitro drug screening and in vivo pharmacology study instantly.

www.addexbio.com

- Biotinylated Reagents
- Cell Lines
- Chemical Building Blocks
- Cytochrome P450 Tools
- Heterobifunctional Linkers
- Molecular Probes

Abfrontier's original initiative was concentrated on **Reactive Oxygen Species (ROS)** pathway products, expanding into areas such as **neuroscience, serum proteins, and specific antibodies** for post-translational modification.

-Over 30,000 custom antibodies provided to customers worldwide since 2004

-HUPO's major antibody partner (Human Protein Atlas project www.proteinatlas.org)

www.abfrontier.com

- Antibodies
- Proteins
- ELISA kits
- SABC kits
- Lysates
- Reagents

The products are a result of years of development, and careful selection of ideas. We go through a rigorous set of evaluation criteria before adding a product to our catalog, and as always, the two most critical parameters are:

No. 1 – quality and stability of the product

No. 2 – cost effectiveness

After a product is included in our portfolio, the standards are kept by having all new production batches go through QC (Quality Control).

www.bioatlas.com

- DNA dyes
- DNA polymerases
- PCR Mixes
- Nucleotides
- Electrophoresis
- Ready-Mixed Buffers

Biomerica is proud of its history of product innovation spanning more than three decades in several major clinical areas.

www.biomerica.com

The first company to manufacture and market tests for:

- Myoglobin (Cardiac)
- H. Pylori (Digestive Disease)
- Histamine (Allergy)
- Self test for Colon Disease
- Early detection of Diabetes

Biosearch Technologies commits itself to perfecting the design and manufacture of innovative nucleic acid based products that accelerate the discovery and application of genomic information.

www.biosearchtech.com

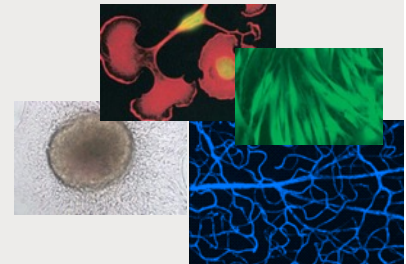

- Stellaris™ FISH Probes
- Fluorogenic Probes and Primers
- Custom Oligonucleotides
- DNA/RNA Synthesis Reagents
- Labeling Reagents
- Immunochemicals

Cell Biolabs, Inc. proudly develops and commercializes innovative technologies and tools for life science research. We are committed to providing the best products that facilitate discovery of the mechanisms underlying cell function and disease.

www.cellbiolabs.com

- Cell-Based Assays
- Viral Expression and Purification Reagents
- Oxidative Stress Assays
- Small GTPase Kits and Reagents

Deliverics Ltd's business is in delivering molecules into and onto cells. Cellular delivery forms the basis for many areas of research and development in the Life Sciences and is an important aspect of therapeutic treatment in many diseases. Deliverics products have been designed to efficiently deliver RNA and DNA into cells in a very gentle and non toxic manner.

www.deliverics.com

SAFEctin™

All-in one reagent for RNA and DNA delivery
>90% with siRNA, miRNA and mRNA
>50% with small plasmidDNA (1-6 Kb)

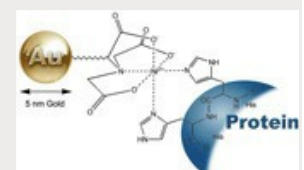

Nanoprobes was founded to develop the most sensitive reagents and technology for detecting biological molecules.

Unique gold labeling technology uses chemically cross-linked metal clusters and nanoparticles as labels.

Unlike conventional immunogold probes, in which colloidal gold particles are electrostatically adsorbed to antibodies and proteins, our gold labels are uncharged molecules which are cross-linked to specific sites on biomolecules.

www.nanoprobes.com

- Conjugates with 1.4 nm Nanogold®
- Enhancement/Developers
- EnxMet™
- Gold Nanoparticles
- Histidine (His) Tag Labeling
- Magnetic Nanoparticles
- Negative Stains
- Xray Contrast Agents

ProSpec is an evolving biotech company providing highly purified proteins worldwide which serve the research community with cytokine-related products for cancer, apoptosis, development, endocrinology, immunology, neuroscience, proteases, and stem cell research.

www.prospecbio.com

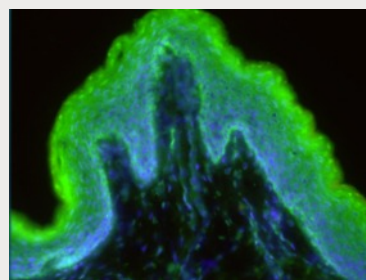

Among the proteins are **Interferons, Interleukins, Bone Morphogenic Proteins, Tumor Necrosis factors, Leptins, Stem Cell factors, Prolactins, Chemokines, Antibodies, Peptides, Enzymes, Viral Antigens**, various growth factors such as: **Platelet Derived, Epidermal, Insulin Like, Nerve, Connective Tissue, Vascular Endothelial, Fibroblast** and more....

ReliaTech GmbH (short for Receptor Ligand Technologies GmbH) is a German biotechnology company founded in 1999. Besides other research products the company develops, produces and sells high quality research reagents for angiogenic and lymphangiogenic research

www.reliatech.de

New anti-human MesP1 antibody (102-PA52) provides brilliant immunofluorescence results.
